# What is FORCE OnDemand ?

**FORCE OnDemand** is You make your own selection and deployment of tools and we realize it for you. This is 100% customization.

Every mechanic and technician has different job focus. And every one has different habit of using tools. Let the tool sets adapted to you instead of you being adapted.

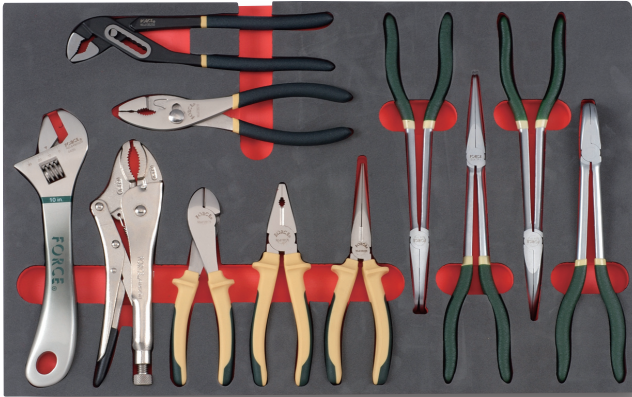

1. For each tool, an exact cut is produced with computer technology which grants easy and quick deployment.

3. The EVA foam is chemical-based and extremely flexible.

2. The exact cuts let recognize immediately where each tool is seated. That saves time and money.

4. Dual color: the upper layer is dark gray, the lower red.

# The basics of **CABIN II** are as follows :

For long term, **FORCE CABIN** has been introduced to users as a concept that tool combination is divided into small units and by putting different units together at will, users can get a tool set that is suitable for a certain job focus.

**FORCE CABIN II** is an enhancement on this idea.

● Proportionate to each other

● Removable cover

● A tenon for assembling two cabin boxes.

For each tool, an exact cut is produced with computer technology which grants easy and quick deployment.

The EVA foam is chemical-based and extremely flexible.

The exact cuts let recognize immediately where each tool is seated. That saves time and money.

Dual color : the upper layer is dark gray, the lower red.

# What is good about **FORCE CABIN II** ?

- When deployed in the trolleys, Cabin boxes can be assembled with each other perfectly in the drawers without wasting any space.

- When you need one of them for a job mission outside, just take it out and put on the cover.

- When you need some of them for a job mission outside, you can also put small units together in a cabin box and then put on cover.
